

Luigui Gallardo-Becerra

DATA SCIENTIST & BIOINFORMATICIAN

☎ +1 619 602 0725 | ✉ luiguimichelgallardo@gmail.com | 🏠 luiguigallardo.github.io/web_page/ | 📺 LuiguiGallardo | 📄 luiguigallardo

Data Scientist and Bioinformatician looking for new challenges to apply and expand my skills. In recent years, I participated in different projects using modern Genomic technologies (NGS), Data Analysis, and Data Science, to obtain novel biological information that culminated in high-impact peer-reviewed scientific publications

Experience

Graduate Research Assistant (Data Science & Bioinformatics)

Institute of Biotechnology, UNAM

January 2019 - December 2022

I was part of different research projects, from the beginning obtaining or creating the raw data to the final report or publication. The tasks that I carried out includes the following:

- Management of research projects: participated in the creation of main and secondary objectives and research questions from different projects to obtain novel biological information useful for the scientific community
- Server management (HPC): managed the Laboratory's server, installed Linux operative systems and specific software/packages, avoided server slowdowns, and built secure server environments
- Creation of pipelines: created pipelines to avoid repetitive workflows and make reproducible analysis using bash, Python, and Snakemake
- Software development: developed several software tools to solve and achieve specific goals using bash, Python, Perl, and R
- Creation of plots: using R, Rstudio, Jupyter Notebooks, Excel, Graphpad, and Tableau
- Maintenance of version control (CI/CD): creation and maintenance of GitHub repositories and their continuous version control
- Creation of reports/publications: using Markdown and Word, I delivered weekly and biannual reports to the members of the Laboratory. Also, I co-authored peer-reviewed publications that are highly cited in their respective areas
- Presentations to the general public and academic events: participated in scientific dissemination, specialized seminars, and congresses

Data Analyst

Appen

October 2016 - December 2018

I was an independent contractor and participated in several projects that included Data Sourcing and Annotation for different Appen clients (browsers, social networks, etc.). The tasks I performed were the following:

- Data collection and Preprocessing: obtention of raw data and preprocessing before passing it to the final client or the Machine Learning Department
- Creation of weekly deliverables: for the final client or project manager
- Content translation: from Spanish to English or English to Spanish

Software Engineer (Internship)

Dept. of Computer Science, CUCEI

May 2016 - July 2016

I participated in the creation of a web application. The tasks that I carried out included:

- Creation of web app: using ASP.NET Core (C#) and Angular (JavaScript, HTML, and CSS), I created an API to save patients' records and images.

Data Scientist & Bioinformatician (Internship)

Institute of Biotechnology, UNAM

January 2016 - July 2016

I participated in the research project “Microbiome of Pacific whiteleg shrimp reveals differential bacterial community composition between Wild, Aquacultured and AHPND/EMS outbreak conditions”. The tasks that I performed were:

- Big Data Analysis: using HPC, Linux, and bash, I analyzed the 16S rRNA information of several samples
- Creation of plots: using R, Rstudio, Excel, and Python
- Software development: I developed several tools for ETL data using bash, python, and Perl
- Creation of paper: with the data obtained from this internship, I co-authored this paper

Mathematics Teacher (Part-time)

Student Coaching

January 2014 - December 2015

As a part-time teacher, I taught middle and high school students math classes to increase their grades or for college admission tests.

- Prepared group and individualized classes and lessons
- Applied weekly assessments to each student

Education

National Autonomous University of Mexico

PH.D. (COMPUTATIONAL BIOLOGY)

Mexico City, Mexico

January 2019 - December 2022

National Autonomous University of Mexico

MASTER OF SCIENCE (COMPUTATIONAL BIOLOGY)

Mexico City, Mexico

August 2016 - January 2019

University of Guadalajara

BACHELOR OF SCIENCE (MOLECULAR BIOLOGY)

Guadalajara, Mexico

August 2012 - January 2016

Soft skills

- Team player who can also work independently with excellent communication skills
- Fast learner and could quickly adapt to new technologies.
- Excellent problem-solving capabilities.
- Can manage a significant workload or several projects from different areas without losing track of them.

Programing Languages, Tools & Bioinformatic skills:

- Programing Languages: Python, C#, R, SQL, Bash, HTML & CSS, JavaScript, Typescript
- Web frameworks: Django, ASP.NET, Angular
- Other tools: High-Performance Computing (HPC), Linux, Tableau, Docker, Snakemake, Jupyter Notebooks, Rstudio, MySQL, PostgreSQL, MongoDB
- Bioinformatic skills: 16S rRNA profiling, Genome/Transcriptome assembly, and annotation, Metagenomics, Metatranscriptomics, Viromics

Languages

- English – Full professional proficiency
- Spanish – Native
