Stanford University
School of Medicine
Stanford, CA 94305-5101

San Diego, CA, January 20, 2023

Dear Dr. Christina Curtis, PhD,

My name is Luigui, and I am writing to apply for this Bioinformatics position because I consider my educational background and work experience make me a qualified candidate for this position.

I would describe my background as Bioinformatics and Data Science. For almost four years, I worked at the Institute of Biotechnology (UNAM) as a Bioinformatician to get novel information from biological data. In recent years, I participated in different projects using modern Genomic technologies (NGS) to obtain novel information that culminated in high-impact peer-reviewed scientific publications listed in my personal website.

Having studied the job description, I am confident I have all the skills, qualities, and qualifications needed to excel in the role. Additionally, I am a fast learner and could quickly adapt to your workflows. I possess excellent problem-solving capabilities and can manage a significant workload or several projects from different areas without losing track of each of them.

I attached my CV and personal webpage, where you can see my portfolio and publications:
https://luiguigallardo.github.io/web_page/

I'm thrilled at the opportunity to use my experiences to participate in frontier research at your laboratory at the Stanford University, and I'm keen to continue developing my skill set with you. I am available for a call or in-person meeting to discuss how I can help you to obtain meaningful information through bioinformatics data.

Thank you for your consideration,

Luigui Gallardo
