

Luigui Gallardo-Becerra

DATA SCIENTIST & BIOINFORMATICIAN

☎ +1 619 602 0725 | ✉ luiguimichelgallardo@gmail.com | 🌐 www.lmgb.xyz | 📷 LuiguiGallardo | 📺 luiguigallardo

Data Scientist with 6+ years of experience in bioinformatics, machine learning, and large-scale data analysis. Proven track record in developing predictive models, implementing automated pipelines, and extracting insights from complex biological datasets. Published author with 14 peer-reviewed publications in computational biology.

Experience

STEM Python Expert (Chemistry and Biology)

Mercor

April 2025 - Present

- Designed and solved complex coding challenges to benchmark and compare Large Language Model (LLM) outputs, verifying the soundness of their logical reasoning.
- Evaluated and debugged AI-generated Python code across STEM domains to ensure correctness, optimal performance, and adherence to industry best practices.
- Conducted reinforcement learning from human feedback by annotating, ranking, and correcting model responses to produce high-quality datasets for AI training.

Graduate Research Assistant (Data Science & Bioinformatics)

Institute of Biotechnology, UNAM

January 2019 - July 2025

- Analyzed metagenomic and transcriptomic datasets to obtain novel biological insights.
- Conducted statistical analyses and feature engineering to identify biomarkers in complex biological datasets.
- Created reproducible bioinformatics pipelines using Nextflow and Snakemake for automated data processing.
- Designed and managed high-performance computing (HPC) workflows for large-scale genomic analysis.

Data Engineer

Appen

October 2016 - December 2018

- Preprocessed and analyzed large-scale datasets for machine learning projects.
- Implemented SQL-based ETL pipelines for data integration and automated reporting.
- Automated data collection workflows using Python and Bash.

Education

National Autonomous University of Mexico (UNAM)

PH.D. IN COMPUTATIONAL BIOLOGY

Mexico City, Mexico

January 2019 - July 2025

National Autonomous University of Mexico (UNAM)

MASTER OF SCIENCE IN COMPUTATIONAL BIOLOGY

Mexico City, Mexico

August 2016 - January 2019

University of Guadalajara (UDG)

BACHELOR OF SCIENCE IN MOLECULAR BIOLOGY

Guadalajara, Mexico

August 2012 - January 2016

Key Skills

- **Programming & Data Science:** Python, R, SQL, Bash, Machine Learning, Statistical Analysis, Data Visualization
- **Big Data & Cloud:** HPC, Docker, Apache Spark, AWS, ETL Pipelines, Database Management
- **Tools & Frameworks:** Jupyter, RStudio, Git, Django, React, Shiny, TensorFlow, scikit-learn
- **Soft Skills:** Problem-solving, Team collaboration, Project management, Scientific communication
- **Languages:** English (Full professional proficiency), Spanish (native)
